EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in Paper filed on 10/19/05 (elected Group I, Species A, without traverse).

The application has been amended as follows:

IN THE CLAIMS:

Cancel non-elected claims 34-47

2. The following is an examiner's statement of reasons for allowance: the original elected claims of Group I, species A are allowed (claims 1-2, 4-11, 13-16, 18-24, 26-31 and 33). However, the non-elected dependent claims in Group I, species B (claims 3, 12, 17, 25, and 32), are also allowed because these non-elected dependent claims depend from allowable generic independent claims 1, 10, 15, and 23. Therefore, claims 1-33 are allowed.

The prior art of record fails to disclose all the limitations recited in the base claims. Specifically, the prior art of record fails to disclose the combination of a method of operation of a module that includes a plurality of integrated circuit dies and a programmable memory device disposed within a housing, wherein the method comprises: determining a set of integrated circuit dies (or a first integrated circuit die), of

the plurality of integrated circuit dies, that meets a predetermined standard, wherein at least one integrated circuit dies (or a second integrated circuit die) not included in the set of integrated circuit dies does not meet the predetermined standard; and programming the programmable memory device to identify the set of integrated circuit dies (or the first integrated circuit die) that meet the predetermined standard, as recited in the base claims 1, 10, and 23.

Similarly, the prior art of record also fails to disclose the combination of a method of operation of a module that includes a plurality of integrated circuit dies and a programmable memory device disposed within a housing, wherein the method comprises: determining which of the plurality of integrated circuit dies are functioning circuit dies and which are non-functioning circuit dies; and programming the programmable memory device to identify the functioning circuit dies, as recited in base claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is 571-272-1703. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on 571-272-1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
